

See you next summer vol. 4 Sept. 2023

Sunset over the Kenai River 09/08/2023

Time flies so fast, it is September now and the resort is about in close. Another year of wonderful and unforgettable memories have been added to our memory alum. This year, we had an unusually wet season. The water level was higher than usual. But the joy we felt when we caught a fish was worth the effort.

The two glaciers – the Snow and Skilak – released large amount of water at once, which was flowing downstream into the Kenai. By a once-in-a-few-years coincidence, a mirror-like lake appeared at RW's Resort, which combined with sunset to make a great photo!!

The New Pricing for 2024 will be uploaded to our website by the end of this year. Please check our website.

We thank everyone to make this season great again !!
See you next summer.
